

Case Study

FABULIX - HYPERCONVERGED INFRASTRUCTURE

ABOUT THE CLIENT

The client is one of the world's top producers of engineered wood products and holds respect across the globe for its product quality, business process, and customer service.

OBJECTIVES

The client was facing some issues with its existing, complex IT infrastructure.

The IT systems were not working in the way it was configured.

The client reached out to ISSQUARED to simplify its IT Infrastructure while reviewing and resolving the issues.

APPROACH & SOLUTION

After discussing with the client's Infra team, ISSQUARED proposed its Fabulix Hyperconvergence solution to address all the client's requirements.

The ISSQUARED team deployed the Fabulix Hyperconvergence solution that catered to all the client's IT Infrastructure needs and provided seamless integration and connection to the Azure cloud.

RESULTS

- ✔ The implementation of the Fabulix solution ensured that the client is able to maintain ensure continuous operations or uptime for an extended period and enhanced optimization with the management stack.
- ✔ Also, the Fabulix solution ensured that the client is able to keep backups and replicate workloads in azure without any agent.
